

# Make *and* Do

## Paper Aeroplane Instructions

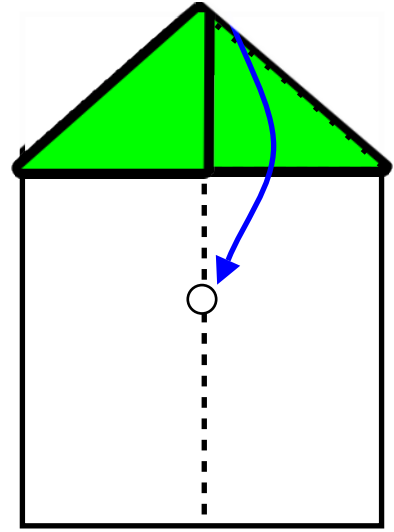

### STEP 1

Fold the paper in half along the long edge, and then open again so you have a crease mark down the middle.

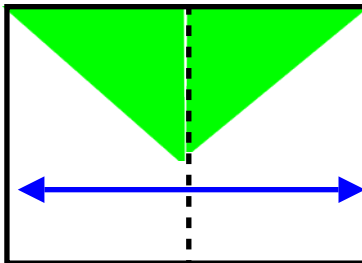

### STEP 2

Fold the top of each corner to the crease in the middle of the paper, so you end up with a point at the front of the plane.

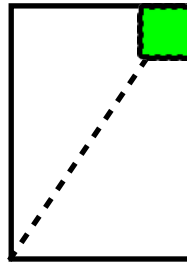

### STEP 3

Take the point at the front of the plane, and fold it down along the edge of the bottom of the triangle.

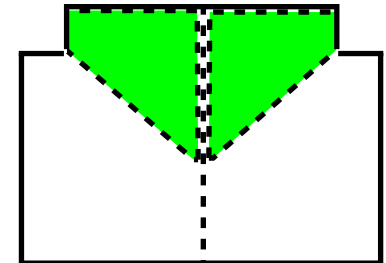

### STEP 4

Using the crease mark in the centre of paper, fold it in half so the triangle is now hidden.

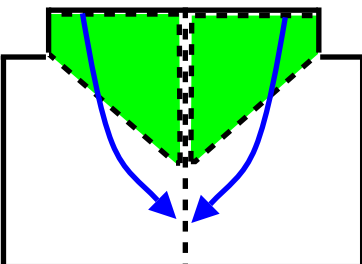

### STEP 5

Using the corner of the paper where the triangle meets, tear a square of the paper..

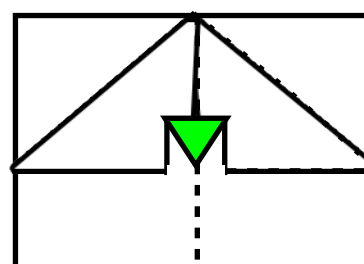

### STEP 6

Open the paper out again, and now you will have a missing square both sides of the paper at the top.

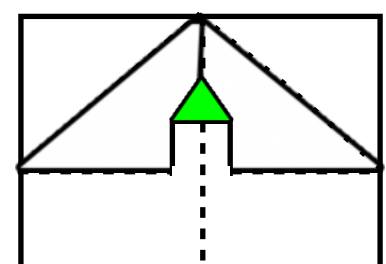

### STEP 7

Repeat Step 2 and so you have a point at the front of the plane again.

### STEP 8

You should now have a small triangle in the square cut out.

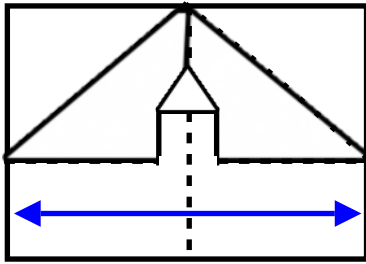

### STEP 9

Take the small triangle in the square cut out, and fold it forwards so it's pointing to the front of the plane.

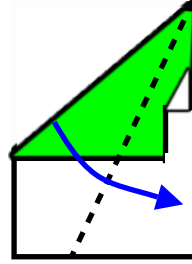

# Make *and* Do

## Paper Aeroplane Instructions continued...

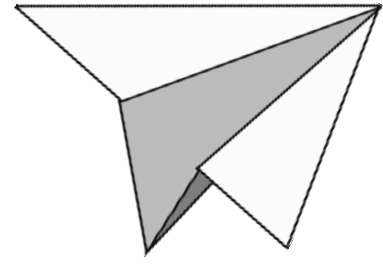

### STEP 10

Using the crease mark in the centre of paper, fold it in half so the small triangle is now on the outside of the plane.

### STEP 11

From the front corner, fold the paper down roughly along the dotted line above to create the wing, and repeat on the other side.

### STEP 12

Your wings should look like the picture above.

Now your aeroplane is finished and ready to fly!

## Challenge

1. See how far and high your plane can fly
2. See if you can create your own paper aeroplane
3. Ask your parent/carer to take a photo or video and post it on Instagram
